Freedom 6500

Free standing control panel. Allen-Bradley PLC and NEMA 12 enclosures insure longest reliability and greatest flexibility.

CHOOSE the Freedom™ 6500 for the most advanced rotating arm system available.

CHOOSE any film and stretch it to its maximum performance level with Highlight's exclusive Dual Power Hydro-Stretch®!

CHOOSE the best, most efficient way to wrap your product utilizing any of five pre-programmed wrapping patterns!

The choice is simple. For the most reliable, efficient and technologically advanced rotating arm system,

CHOOSE Highlight's Freedom™ 6500!

Dual Power Hydro-Stretch® delivers more film performance wrapping loads more securely and at lower costs.

Film Force applied to the load is precisely controlled to wrap fragile loads lightly and heavy loads tightly, independent of pre-stretch level.

Carriage is angled to wrap low to the ground. Dual Power Hydro-Stretch® locks pallet to load and eliminates film failure.
